In response to increasing demand from Practitioners, Biotics Research has developed the Weekly Practice Builder program to bring important, leading-edge information and literature to you, thereby helping facilitate the growth of your practice. Biotics Research products are available exclusively through Healthcare Providers.

Our featured supplement of the week is **b-VITAL®**

Why do your patients need b-VITAL®? As a steroid hormone from the androgen group, testosterone has been linked with a plethora of functions. In humans, testosterone is derived from cholesterol and produced primarily in the testes in males and in the ovaries in females. Additionally, in both genders, the adrenal cortex manufactures small amounts. In both men and women, testosterone plays a key role in health and well being and in sexual functioning. Unfortunately though, testosterone levels gradually decline with age, and many symptoms long associated with simple aging, can in fact be linked to this gradual hormonal deficiency. Low levels of testosterone has been linked to: loss of muscle mass and bone density, decreased physical endurance, altered mood and memory (recall), increased risk of cardiovascular disease, imbalanced serum lipids, increased risk of stroke, increased risk of diabetes via elevated blood glucose and insulin levels, and sexual dysfunction. While there is some debate on the need for hormone replacement therapy in males, most practitioners do advocate promoting healthy, normal testosterone levels.

Why choose b-VITAL® from Biotics Research Corporation? Each capsule of **b-VITAL®** contains 750 mg of Peruvian Maca root and 50 mg of Velvet Deer Antler (from Elk). A preliminary study of men, ages 45-55, found that supplementation with **b-VITAL®** naturally augmented testosterone levels. 100% of test subjects saw an increase in salivary free testosterone. **b-VITAL®** supplies a proprietary blend of Peruvian Maca (*Lepidium meyenii*), used for centuries to restore balance and increase energy, and velvet deer antler, harvested live from American Elk. The many traditional uses of these adaptogenic compounds are due to their rich and diverse nutrient, chemical and phytochemical compositions. **b-VITAL®** is a patented product, available exclusively through Biotics Research Corporation. As always, you can count on Biotics Research Corporation to offer superior nutritional products supplying "The Best of Science and Nature."
